Statements from students...

What experiences do you feel will be helpful in your future education/career?
* I believe my work ethic and professional communication skills have improved and will help me in the future with communicating with my co-workers and patients.
* I feel more able to prepare learning resources for other people and present them to an audience in a professional and educational manner.
* Never give up, don’t not do something just because you don’t have to. Always strive for better and more.

What did you like best about the Honors Program?
* That it is flexible and it incorporates students' personal interests into their honors projects.
* I can learn more about the subject I am taking a class in than I would have without doing it for Honors.
* The opportunity to have the self directed learning. It’s great to be able to pick something I’m passionate about and then turn that into a real life project. I was happy to be able to do the work but then to be able to share the information with my classmates made it all that much more worthwhile.

Students enrolled on any of the campuses at Mineral Area College may take advantage of the various opportunities offered through honors credit as long as the instructors teaching those classes are willing. However, only those students who meet the criteria listed in the eligibility and completion sections of this brochure will be allowed to enroll in MAC’s Honors Program and receive full recognition at Commencement.
