PARAMEDIC TECHNOLOGY

THE COLLEGE

Mineral Area College offers a Certificate in Paramedic Technology and an Associate of Applied Science Degree in Paramedic Technology. The certificate program is an extended three semester curriculum consisting of 51 credit hours and the Associate of Applied Science degree consists of an additional 34 credit hours.

MINERAL AREA PARAMEDIC PROGRAM

Graduates of the Paramedic Technology program are licensed pre-hospital professionals recognized as vital members of the health care team. Training consists of classroom instruction, laboratory practicum, field internship experience, and hospital clinical rotations. Paramedics are trained to provide advanced life support to the acutely ill and injured. They are skilled in patient assessment and recognition of diagnostic signs and symptoms of injury and illness. Through an advanced, evidence-based curriculum, students are trained to evaluate patients and deliver treatment rapidly and efficiently, thereby reducing morbidity and mortality. Paramedics are employed by ambulance services, fire departments, hospitals, emergency communications centers, and industrial medical and safety departments.

Upon successful completion of the Certificate program or Associate of Applied Science Degree program, the student is eligible to apply to take the National Registry Exam. Satisfactory achievement on the examination will qualify graduates for licensure as a Paramedic.

If you have special needs as addressed by the Americans with Disabilities Act and need this publication in an alternative format, notify us at (573) 518-2152. Reasonable efforts will be made to accommodate your special needs.
